Wiring believed cause of \$100,000 fire

A preliminary investigation has concluded that electrical wiring started the worst fire of the last five years in Drayton Valley last Friday night.

Estimated damage to Ben and the apartment above it is \$100,000 or more.

The fire was first noticed around 10 p.m. Friday night and 16 firemen spent the entire night fighting the blazes and trying to find the source of the fire.

"Most of the fire was within the walls and it was difficult to determine where it was," says fire chief Shudon Paine. "We were virtually chasing it all over the building."

The building is 40 to 50 years old and the insulation was made of wood chips, which made it harder to contain, the fire chief adds. A couple times during the night and early morning, the firemen thought they had the fire under control but it kept breaking out again. By 6:30 a.m. the fire was

finally under control and by noon Saturday, Mr. Paine felt it was safe enough to remove the fire trucks. Two young child hands-back from Manitoba were living in the apartment above the definition.

"Around 10 o'clock, we were sitting upstairs watching television and a couple of lights went out so I went downstairs to the office (in the main floor). I figured a fuse had gone out," said Stephen Joseph, one of the tenants, on Monday.

"I noticed some smoke around the bottom of the water heater on the main floor, and I started to go get a pail of water when I heard a lot of cracks coming from the west end of the store, so we called the apartment."

Mr. Joseph and his roommate, Ben Shaw, lost all their furniture, two television sets, a stereo and a washing machine.

An inspector from the fire commission office visited the site on Monday and Mr. Paine says it "appears" the fire was started by electrical wiring in the basement of the building.

The fire department received a call at 10:05 p.m. Friday night and the first fire truck arrived with a full crew around 10:08 p.m.

Firemen Hydrants
But the firemen ran into trouble with first one then another frozen fire hydrant which delayed the firefighting by about five minutes, says chief Paine.

The fire chief says the unusual winter weather of hot and cold temperatures probably caused condensation in the hydrants which were frozen.

The waterworks department checks the hydrants to (Continued on page B2)

A CHAINSAW WAS used to cut through the roof in an attempt to control the fire which ravaged the apartment of the two young Manitobans and Ben's father-in-law last Friday night. Firemen fought the smoke and fire throughout the

night and the fire was finally brought under control at 6:30 a.m. Saturday. Electrical wiring in the basement is believed to have caused the fire, the report in Drayton Valley the last five years.

The Western Review

Drayton Valley, Alberta, Wednesday, January 24, 1991

Service firms feel impact of budget restrictions

Most of the service and supply businesses in Drayton Valley are already feeling the impact of the federal budget, and those who aren't expect the real impact will come after the spring break-up.

In a telephone survey of local businesses last week, many reported a drop of 10 to 20 per cent in activity from the same time last year.

Others said they have decided not to buy equipment which they were planning to buy before the budget was announced on October 20.

Some of the oil and supply businesses have even laid off employees and others reported the competition for jobs is getting tougher and prices for contract work have dropped.

Others say new companies which borrowed heavily in start or expand a business are having the worst time of late.

"This is usually the hardest time of the year," says Hal Meek, assistant manager of Thomson Weld Services, but the company is only working with seven drilling rigs compared to 20 to 25 rigs during the last two years.

"Everybody is predicting a real big slowdown around spring break-up," he adds. Mr. Meek says activity in

the West Pembina area was already slowing down but since the federal budget, activity has been brought to a complete standstill.

Most of the work now being done by service companies was committed by all producing companies before the budget was announced, says Mr. Meek.

Nowman has 21 employees and has not yet laid anyone off, adds Mr. Meek.

Sales are down 20 per cent, says Dave Ellis, branch manager of Arrow Welding Supplies. The company provides welding equipment to welders, oil companies and drilling companies.

Mr. Ellis says one company decided not to proceed with a planned purchase of 500 pounds a month of welding rods because they were manufactured in east (Continued on page B2)

Majorettes

The Legion Majorettes were in action again last week, this time performing for seniors at the drop-in centre.

Service group dealing with enemy?

By Rick Chastard
A spokesman for the Brooks United West Association says the Drayton Valley energy service group is "dealing with the enemy" and won't be successful in a co-operative effort with the Canadian Manufacturers' Association (CMA) to lobby for change in the national energy program.

"I don't think they will get anywhere," said Pat Brown, president of the Brooks group last week, "and if they do, it won't be fast enough to affect the Constitution or budget thing."

The Energy Services Association of Alberta, based in Drayton Valley, recently called off a proposed boycott of goods made in Ontario and Quebec in favor of a joint effort with the CMA to lobby provincial and federal governments for change in the federal program.

The Brooks group on the contrary announced a full boycott last week effective immediately.

Mr. Brown says he believes the CMA is playing for time and only wanted the Drayton Valley service group to call off the boycott.

The local group is "dealing with the enemy" and will continue to have and will continue to state the same case, he says.

Mr. Brown says it's "great" that the CMA

supports higher oil prices. "That's the only one problem," he says. "The other ones are the Constitutional proposals, the proposed federal response to maintain the oil industry and the attitude of the Canadian Manufacturers' Association (CMA) to lobby for change in the national energy program."

Mr. Brown further says that the Drayton Valley service group had the power of a threatened boycott when its representatives visited Toronto. But then after two quick meetings and a press conference, the boycott was called off.

"What did we get out of it?" he asks.

The Drayton Valley group received a telegram last week from the CMA, says Mr. Brown, which only says the central Canadian factories are concerned about oil self-sufficiency for Canada and favor higher oil prices.

The point has already been made by a number of prominent individuals and was organizations and Mr. Brown says he doesn't believe the telegram shows much support for the concept of the Alberta boycott.

Pay More
The Brooks group has about 250 industrial members and half to two-thirds of them are from the oil service and supply sector, Mr.

Brown says members are going to pay up to 30 per cent more to buy goods manufactured elsewhere than Ontario or Quebec. The members will boycott personal as well as business items manufactured in other parts of Canada, including clothing, building services, grocery items, federal Crown corporations and even cigarettes.

The boycott, says Mr. Brown, is aimed at letting the blue collar workers in eastern Canada who voted for the federal Liberal party and the Conservative government in Ontario.

report the pre-reparat

West-Pol organizations will help with the distribution.

In cases where alternate goods or suppliers cannot be found, members of the Brooks group will continue to purchase from Ontario and Quebec.

People will also be asked to put a lock on their compartment.

PLANT FOREMAN ED Poterchen examines a 120-foot-long storage tank brought at great difficulty from Calgary.

Gas processing plants extend life of oilfield

By Rick Chastard

In the same of conservation, and in order to extend the life of oilfields, millions of dollars worth of equipment are being hauled to remote locations.

The equipment—pipes, valves, manifolds, electronic parts, storage tanks, motor pumps—are hauled from all parts of Alberta and the United States to build what oil companies call gas processing plants and the EERC calls gas "conservation" plants.

In remote locations surrounded by forests of small spruce and poplar, the steel slowly takes shape, the buildings rise, the towering stacks are reared to flare unwanted hydrocarbons, and the gas plants start the job

with the crude oil.

The plant will process permit from the Energy Services Conservation Board to flare five tonnes a day of lighter hydrocarbon liquids.

Across the province, the EERC permits flaring a maximum of 10 tonnes a day of the highly toxic hydrogen sulphide.

The plant includes a battery, a compressor building, a separator building to separate the liquids from the gas, an injection, handling, workroom, a control room, an office and a process building where the gas is cleaned of impurities.

About 20 people are employed in the construction of the plant and once it is completed a permanent staff of 15 or 14 people will be employed.

Besides the plant under construction, Chevron Standard has a smaller plant in the Brumfield field, which was completed last November, and a plant in the Higney region.

EMPLOYEES OF PHOENIX Construction are hard at work completing the \$10 million gas processing plant west of Cypress. The plant should be finished by the end of April.

One of the plants under construction west of Cypress by Chevron Standard, should be finished by the end of April. The plant will significantly extend the lifespan of the oilfield, says foreman Ed Poterchen.

The prime purpose of the plant, which will cost over \$10 million, is to conserve and make use, rather than flare, hydrocarbons.

The plant will use two sources of gas—associated gas which is produced along with crude oil recovery and a condensate gas field west of the plant.

The associated gas will be "sweetened" by taking out the acid components, and compressed to 6,500 pounds of pressure per square inch before being re-injected into the oilfield.

Since gas will be used to fuel the plant, some gas will be sold via pipelines and the rest used to maintain pressure in the oilfield.

A byproduct of the process will be Liquid Petroleum Gas (LPG) which will be stored in a tank and sold via pipeline for further processing into butane and propane.

Another byproduct is condensate, which is mixed

with the crude oil.

New library building attracts more members

Since the new town library opened in December, the membership has increased over 50 per cent.

New librarian Lois Peterson says the statistics are "gratifying," and she would like as much feedback from the community as possible, telling her what they want in the new library.

"I think the new facility has a lot of promise. It's bright, cheerful, we have good hours, staff, location, and facility. It's just a matter of putting it all together."

Mrs. Peterson says she would like to expand the reference and the adult non-fiction section of the library.

"The children's section is very adequate. The juvenile section is quite adequate at the moment. But I would like to gear up the reference section, for all ages, as well as the non-fiction area."

The library now has the space to expand its collection, and Mrs. Peterson says it has been her experience that if the information is available, people will use it.

Mrs. Peterson recently moved from Ponoka, where she ran the senior high school library for 12 years. "I really enjoy the young adult age group, and I hope they will use the library," she says.

"We want the library to be a friendly place, where people can browse. The days of the old, austere library and the personnel that went along with it are long gone, thank goodness," she says.

In a few months, after a routine has been established, and the library has received an indication of what the public requires, Mrs. Peterson says she will look into programming.

"The library board is looking for donations to furnish the multi-purpose centre with tables, chairs and carpeting."

Mrs. Peterson says the room might be used for groups who need a meeting place, or, if the budget permits, it might be used as an audio-visual centre with screen and projector.

But again, she adds, input from the community is desired.

Since the new library opened, the clerical staff have been "swamped" with an increase of membership, and Mrs. Peterson says volunteers are needed.

"The people in this community had great foresight in using some of the money from the 1976 landrivers to upgrade their library facility. The statistics speak for themselves," says Mrs. Peterson.

Snowmobile accident causes child's death

A 12-year-old Rocky Rapids boy was killed Saturday in a snowmobile accident at the sand quarry, northwest of the old hill.

Great Edward Cross died when his snowmobile fell on top of his report Drayton Valley RCMP.

The boy apparently was climbing a steep incline, when he lost control of the snowmobile. He died of asphyxiation due to injury.

All snowmobile owners are required to have registration and insurance, and no one under 16 years of age is allowed to drive a snowmobile on public property, according to the provincial Off-highway Vehicle Act.

Library, checks Drayton Valley.

New library building attracts more members

Since the new library opened in December, the membership has increased over 20 per cent.

New librarian Lois Peterson says the statistics are "gratifying" and she would like to see much more from the community as possible, telling her what they want in the new library.

"I think the new facility has a lot of promise. It's bright, cheerful, we have good hours, staff, location, and facility. It's just a matter of putting it all together."

Mrs. Peterson says she would like to expand the reference and kids adult non-fiction section of the library.

"The children's section is very adequate. The juvenile section is quite adequate at the moment. But I would like to gear up the reference section, for all ages, as well as the non-fiction area."

The library now has the space to expand its collection, and Mrs. Peterson says it has been her experience that if the information is available, people will use it.

Mrs. Peterson recently moved from Poncha, where she ran the senior high school library for 12 years. "I really enjoy the young adult age group, and I hope they will use the library," she says.

We want the library to be a friendly place, where

people can borrow. The days of the old library and the personnel that went along with it are long gone, thank goodness," she says.

In a few months, after a positive has been established, and the library has received an indication of what the public requires, Mrs. Peterson says she will look into programming.

"The library board is looking for donations to furnish the multi purpose centre with tables, chairs and carpeting."

The room might be used for groups who need a meeting place, or if the budget

permits, it might be used as an audio visual centre with screens and projector.

But again, she adds, input from the community is desired.

Since the new library opened, the clerical staff have been "cramped" with an increase of membership, and Mrs. Peterson says volunteers are desired.

"The people in this community had great insight in using some of the money from the 75th anniversary to upgrade their library facility. The statistics speak for themselves," says Mrs. Peterson.

Snowmobile accident causes child's death

A 15-year-old Rocky Rapids boy was killed Saturday in a snowmobile accident at the sand quarry, northeast of the city.

Grand Edward Cross died when his snowmobile fell on top of him, report Drayton Valley RCMP. The boy apparently was climbing a steep incline, when he lost control of the snowmobile. He died of asphyxiation due to injuries.

All snowmobile owners are required to have registration and insurance, and so one under 14 years of age is allowed to drive a snowmobile on public property, according to the provincial Off-Highway Vehicle Act.

LOIS PETERSON, THE new librarian at the Drayton Valley Municipal Library, shows the reference section, which is soon to be expanded. In the month of December alone, membership with the library increased 20 per cent.

LIGHT DUTY
PICKUP

HEY !! LOOK US OVER !!

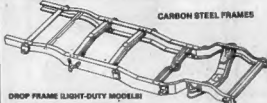

ALL NEW
BODY

112% more galvanized steel than last year's model

For 1981 on all light-duty pickups is the more operator-oriented instrument panel. Featuring improved appearance, better visibility of instrumentation and improved radio accessibility. Gauge and indicator housings, lighting, horn and wiper motor gauges have all been designed for improved driver accessibility.

In light-duty 1981 thru 480 conventional models, frame side rails drop to the surface under the cab area. This lowers cab floor and steps, making it easier to get in and out of the cab. It also improves stability for lowering the center of gravity, at no sacrifice of ground clearance. Viewed from above, side rails converge slightly toward the front, to accept front suspension without providing rear stability. Components, which give torsional rigidity and stability to the frame, are riveted to the frame using where accessibility is essential as with engine supports. These areas are attached by bolts.

Community eager to see new hospital

By Jayne Creighton

For nearly five years, Gladys Stoe would drive from Drayton Valley to Wetaskiwin, where her father was living in a nursing home. He was in his sixties and a paraplegic. Mrs. Stoe would work double shifts in order to have weekends off to bring her father to her home, to spend one day with the family.

By the time the new acute care section of the new Drayton Valley hospital is ready, it will have taken the hospital board members and the administration 11 years of negotiating, cajoling and planning with the provincial government.

"I'm anxious to see the results after so many long years of effort," said hospital executive director Jim Jensen. "Some people still don't believe we're getting a hospital. They won't believe until they see some beds being dug."

Drayton Valley's nursing home, which has been planned for over eight years, will be part of the new \$11 million hospital.

The new acute care section will include nursing home patients as well as auxiliary patients. "We wanted to make it as broad as possible," said Mr. Jensen. "We want it to be a deinstitutionalization center. It is possible for nursing home patients to get back into society, said Mr. Jensen.

"The concept behind this is to take people out of the hospital for a nursing home. It's not a new idea, but it's a new twist."

"Planned Construction The first phase of construction on the active treatment wing will begin this summer. Eighteen months later, the new acute care wing will be started, on the existing hospital site. Three years from this summer, Drayton Valley will have its new hospital.

Fifty beds have been set aside for non-acute care patients, but Mr. Jensen says the time the hospital is completed, he will be applying for another addition to the wing.

"I won't take long at all to fill those beds." A second floor can be built on top of the non-acute care wing for an additional \$10 beds.

Each "pod," shared by 10 patients, there will be small rooms, as well as "odd" rooms where visiting families can have privacy. Every patient who can get out of bed will use the central dining area. "The emphasis," said Mr. Jensen, "is on rehabilitation, keeping active, and getting involved."

Eight years ago, the Drayton Valley hospital board applied for a 50 bed nursing home. It was turned down by the Edmonton Regional Nursing Home District. Drayton Valley withdrew from the body, and formed their own, with the boundaries in accordance with the hospital district.

The board re-applied for a 50 bed nursing home, which the government turned down again. A few facilities in the existing hospital were upgraded.

"The board refused to settle for less, and proceeded to fight for bigger and better facilities," said Mr. Jensen.

Finally, in 1980, the board was able to announce the government's approval to build a new hospital, with a non-acute care wing for nursing home and auxiliary patients.

While other towns had hospitals approved and built within five years, Drayton Valley will have waited 12 years before the new hospital is completed.

Mr. Jensen said the delay partially was due to a changeover of four health authorities along the plan was first put to the government.

"And the board refused to accept handouts from the government, and by doing that we created additional delays."

"The fight took time, but it will be worth it," he added.

Harry Tenebris, president of the Nursing Home Society, says he is really pleased with the plan for the new hospital. "But I just feel that it didn't come soon enough. A lot of folks missed it. There were a lot of people, and many of them died in their homes."

Back to square one with subdivision request

The continuing saga of the Big Country Machinery subdivision proposal took a 180 degree turn last week with the local Municipal Planning Commission rejecting the latest proposal for a three parcel subdivision.

The Municipal Planning Commission debated the matter last week and recommended to council the subdivision be approved if it conforms to the earlier application for two parcels.

The MFC also wants a 15 foot road widening on the dedicated Town council is

expected to double on the recommendation of its staff meeting January 22.

The town staff recommended against the subdivision because of poor planning and the lack of an area structure plan. The staff is also concerned that allowing the subdivision will set a precedent in other cases where two buildings are built on one lot.

Judy Creek postponed

Joe Macdonald, Canada Ltd. has postponed indefinitely its enhanced oil recovery project for the Judy Creek oilfield northwest of Edmonton.

Jack Armstrong, chairman of Imperial Oil, Egan's parent, told an Ottawa Board of Trade meeting that the federal government's

new energy policy has affected Imperial's plans in three areas, and has caused the company to re-examine ongoing development on the Cold Lake oilfield in the planned 1981 exploration program and has resulted in the Judy Creek postponement.

Parkland county considers business licence bylaw

By Dale Lewis

The County of Parkland may institute a business licence bylaw to control and keep tabs on county businesses, according to council members. As a meeting of council to discuss planning matters last week, Count Breckenridge, county planning director, presented council with a draft bylaw that would make the issuance of a business licence mandatory before any person could begin a full-time business.

"We really have no business licence as such, and we have had to control business so through the development permit, but that hasn't been all that satisfactory," Mr. Breckenridge told council.

He said that the system of using development permits (which cost nothing) to control and keep tabs on county businesses, is unsatisfactory, because people have no incentive to remove them each year.

A development permit stipulates what use may be made of a particular piece of land; it does not have to say what business is carried on there, and it doesn't have to be renewed each year," Mr. Breckenridge said.

As a consequence, holders of development permits have no incentive to remove them, although the county requests renewal, and the request is usually granted.

County reeve Les Miller expressed concern over how the county would classify businesses, and said that many people engage in a business only at certain times during the year.

The new bylaw is expected to be adopted by the county council at a meeting on Feb. 10, 1981.

Under the bylaw currently being considered by council, businesses would be charged \$100 per year for a business licence, while any other business would be charged \$150 per year.

Community association service clubs and non-profit groups would be charged a \$10 fee each year to cover paperwork, Mr. Breckenridge said.

"These are only general fees, we would have to make a more detailed breakdown for resident and non-resident owned businesses, and for other classifications of businesses," he added.

Recreation grants for disabled, seniors

A \$90,000 financial grant program designed to improve the quality of recreation programs for disabled and senior citizens was announced Jan. 15 by Alberta Recreation and Parks Minister Peter Tyrrell.

The grant program for Special Groups Programs will offer grants of up to \$5,000 per project to municipal recreation authorities and provincial recreation associations to fund and/or enhance innovative recreational projects created to increase the participation of these groups.

"We are hopeful that this grant assistance program will stimulate the development of good ideas on the way to get more senior citizens and disabled persons involved in the variety of recreational activities open to them," Mr. Tyrrell said.

The financial assistance program is used to cover such expenses as program staff salaries, materials and all other equipment required for the project, transportation costs of participants, program publicity and facility rental.

For further information and grant application forms, contact Recreation Services to Special Groups, Alberta Recreation and Parks, 1000

100 St. Edmonton, T6C 1L6 or telephone 497-9711. Applications should be received by February 15 for consideration under the program.

Re: Achievement Awards

The Town of Drayton Valley would like to honor all those citizens who participated and possibly achieved a first, as could be third best town, in a Provincial level competition during the 1980 calendar year.

The Achievement Awards banquet will be held on Friday March 20, 1981. Seating will be first, second and third place from Provincial competition, and nominees will be presented to those who achieved first, second or third place from.

A Provincial Competition is one that is open to residents from throughout the Province of Alberta. Individuals or teams who participated in class, national, local, district, area regional or zone competitions are not eligible for the awards.

We are asking each organization to submit, with the award, a letter from the person or persons who brought distinction to the organization, and the community, by participating in the Provincial competition. This letter should be submitted to the office with each person's name, address, telephone number, and a list of all awards won. If you wish to be contacted, let us know by February 15, 1981 so that we can contact each individual personally about the Achievement Awards Night.

PUBLIC NOTICE

Notice is hereby given that the Mayor's Office in the Town Hall in Drayton Valley will be open each Wednesday afternoon between the hours of four and six o'clock to give citizens an opportunity to meet with the Mayor and/or Councilors on matters of concern, or for information about Town Operations or submission of suggestions.

We are scheduling certain phases of the Town Operation to accommodate placing Councilors and/or appointed officials on certain Wednesdays, as follows:

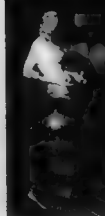

First Wednesday of the Month: Financial
Second Wednesday of the Month: Recreation
Third Wednesday of the Month: Transportation & Utilities
Fourth Wednesday of the Month: Health & Welfare

Court news

Woman pleads guilty to theft, forging

A former Whitcomb woman pleaded guilty to counts of theft of approximately \$10,000, forgery, possession of a stolen vehicle, and carrying a loaded gun in Drayton Valley court on January 15.

Glenda Sawyer was charged with converting funds for her own profit from a Whitcomb company while she was employed as a bookkeeper between January 1 and May 31, 1980.

Crown prosecutor Don Gibson told the court that Mrs. Sawyer had obtained the funds by writing cheques to non-existent employees.

The exact amount of funds was not calculated, and Mr. Gibson, because the bank and ledger were destroyed, however, Mrs. Sawyer and her employer agreed that the amount was approximately \$10,000.

Judge M.F. McIsaac requested a pre-sentencing report. The case has been remanded to March 31.

A 34-year-old B.C. man pleaded guilty to charges of theft of approximately \$10,000, forgery, possession of a stolen vehicle, and driving while a blood alcohol level was over .08.

Donald Ramsey, who was charged with the two counts on December 13, was fined \$100 for possession of marijuana, and \$400 for the impaired driving conviction.

Mr. Ramsey had his driver's license suspended for at least six months.

A 27-year-old Drayton Valley man, William Clark, was fined \$55 after he pleaded guilty to a charge of being intoxicated in a public place.

A 38-year-old Berryman man was fined \$50 for Regal possession of liquor. Rocky Martin pleaded

guilty to the charge, which was laid on December 6. Mr. Martin was fined \$50 for possession of a partially full bottle of Whisky beer in his vehicle.

A school bus driver, who was charged under the Highway Traffic Act with driving without due care and attention, pleaded not guilty in court last week.

Rudolph Ratch, who was charged following an accident on November 25, will appear in court on April 31 for his trial.

A Calgary man pleaded guilty to two charges of speeding in court last week. James Geyer was fined

\$50 for speeding on July 30 in Stoneyham, and \$50 for speeding in Calgary on August 1.

A 21-year-old Lethbridge man pleaded guilty to charges of speeding and failing to appear in court. Lawrence Laroche was fined \$50 for speeding on November 8, and \$50 for failing to appear in court to answer to the first charge.

Mr. Laroche told the court that he was from "back east," where offenders are given a second notice to pay \$50 when they have failed to pay within the limit of the first time.

A 51-year-old Medicine Hat man pleaded to a suspended sentence, and was placed on probation for nine months, after he was convicted of two counts of false pretenses.

Peter Baker was charged with failing to make restitution in the amount of \$800.50 after he was convicted of defrauding the Social Services department of that amount. Judge M.F. McIsaac

remanded that the time of imprisonment be spent in an alcohol treatment centre.

A 29-year-old Lethbridge man pleaded to a suspended sentence, and was placed on probation for nine months, after he was convicted of two counts of false pretenses.

Peter Baker was charged with failing to make restitution in the amount of \$800.50 after he was convicted of defrauding the Social Services department of that amount. Judge M.F. McIsaac

remanded that the time of imprisonment be spent in an alcohol treatment centre.

Board extends rollerskating program

By Dale Leman

Following through on a successful pilot project last year, the Drayton Valley recreation department will be starting nine weeks of rollerskating at the same time this summer.

But the summer program means the summer figure skating school, which has been in operation for the past nine years, will be forced to cease operation.

At the regular meeting of the Drayton Valley recreation board on Jan. 13, board members accepted as policy a feasibility study recommending that the areas be used exclusively for rollerskating from June 13 to the end of August.

The rollerskating program proper will be offered to the public from the first of July through to the end of August, with the two weeks prior to start-up reserved for surface preparation.

The summer figure skating school has traditionally rented the areas for weeks in mid-June, and although board members said it was unfortunate the school had to shut down, optimism of the school's return overruled the school's loss.

"Although it hurts to us in the summer with the figure skating school, we would have to look at putting a larger ice plant in, because the one we have just can't handle it much longer," Mr. Brown said.

Recreation director Ron Brown pointed out to board members that the figure skating school's operation in the summer has posed problems for the area staff in the area of maintaining ice during the summer months.

He said the job of keeping ice in the areas during the summer was too big a job for the existing ice plant to handle, and continued operation of the school would entail added expense for the town.

"If we are going to run ice in the summer with the figure skating school, we would have to look at putting a larger ice plant in, because the one we have just can't handle it much longer," Mr. Brown said.

Highway Council

The Frank Maddock Amateurs took it on the club on Saturday, as they lost both games in a six-team bracket tournament in Marksville.

The Amateurs opened the tournament against Valley County's High team, but as they were out of the game, they were out of the game.

Sherrard Park, the same team they lost to last week, and the plot was much the same this time around, as they dropped a 4-21 decision.

"We had a few girls give strong performances throughout the game, but as they were out of the game, they were out of the game."

Chen Team

In the second game against what coach Schwab says is the closest team of North Central time bracketed, the team lost 1-10.

Bill's eight rollerskaters lost their 1979-80 season, which placed them in the provincial last year, the team is by the time of the game at the present time, Schwab said.

"As a result, the game was not looked upon with much optimism by the girls, as they knew what they had to do to win."

Faced with such tough opposition, the Amateurs put in their best game of the tournament for three games, and over down 11-21 at half time.

D.V. METER All Stars more in on a Whitcomb puck carrier during Mike hockey action at Canadian Arena on Saturday. The All Stars fall on hard times in the game, as they dropped an 8-3 decision to Whitcomb.

Figure skating club protests

(Continued from page B1)

The reason we are given is that the compressor won't take maintaining ice to the summer and also they (the recreation board members) were reluctant," Mrs. Fraser said.

She said the figure skating school was willing to reduce its summer program to one month from six weeks, but said that complete closure of the school would have a negative impact on local skaters.

"As a result of this decision, some children are going to have to go out of town for summer skating until November, some kids rely on this intensified training for their advancement."

According to Mrs. Fraser, the closest figure skating summer schools in the province are located in Edmonton and Sylvan Lake, and sending the kids there would be just too costly.

Although the original feasibility study recommended operating the reformatory for 13 weeks during the summer, from the first of June to the end of August, objections from board member Alvin Spierling led to the shortening of the program by two weeks.

Mrs. Spierling, a physical education teacher at Frank Maddock High School, said the proposal as outlined in

the study would take away a lot of one of the school might make the county and the town, the school makes one of the areas during the spring and fall for tennis and lacrosse.

"This proposal would take away a lot of one of the school might make the county and the town, the school makes one of the areas during the spring and fall for tennis and lacrosse."

She added that by starting the reformatory in the middle of June, the high school would have to cut its programs at the end of May, a situation the high school would not accept.

"Every year it seems we are being cut back to the amount of time we have the arena, and this cut would make the program we have at the arena totally untenable," Mrs. Spierling added.

However, associate recreation director Don Brown noted that, under the reciprocal use agreement, the high school could make use of the reformatory program as an alternate place of program, and the only one to the students would be for skate rental.

Brown noted that, because the reformatory program was successful, the town had little choice but to expand it, taking over the arena for the

school year.

"Our feeling was that the reformatory program was successful and will be successful again, and that income was vital to the arena only for this purpose during the summer," Mr. Brown said.

"We looked at every alternative to raising a successful program without taking over the arena for these months, but there just wasn't any other way."

During the seven week program last year, the reformatory attracted an average of 150 persons per session, and realized revenue of \$8,780.65. During the same period, expenses incurred by the program amounted to slightly less than \$5,000.

This small profit was sufficient to warrant further examination of an expanded program, and despite the protests of Mrs. Spierling, some board members were reluctant to shorten it.

"I think if you take a project that might make money and cut it to the point where it won't make any money, the town council is going to reject it," board member and town councillor

Alvin Spierling said.

"They aren't going to want to take on similar money losing project."

COMPLETE BANQUET FACILITIES FOR LARGE OR SMALL GROUPS

WHEN YOU'RE YOUNG it's sometimes tough to stay on your feet, especially when you're involved in a hot and heavy hockey game. The youngster with the Whitcomb All Stars team found the going a little slippery against the D.V. Meter

All Stars in minor hockey action on Saturday. Despite a few problems with the heating, Whitcomb went on to defeat the All Stars 8-3.

'Roof caves in' on Amazons

(Continued from page B1)

St. Albert pulled away in the third quarter, and after three quarters of play had a 40-0 lead.

"This was when the roof caved in," Schwartz said. "Many of the girls just gave up in the fourth quarter, and they looked at 10-0 in the last quarter, finishing with a 61-30 final score."

The final games pitted St. Albert's Post Lane High against the Mount Allison St. Albert High in the tournament final, where Marvella and Salisbury won in the consolation.

Some for both games were unavailable at press time.

The Amazons' record now stands at six wins against four losses, with three of the losses coming against schools with populations of between 1,200 and 1,800 students.

Commanders fall to Edson

The Drayton Valley Commanders took a 4-0 lead and then watched as an Edson Junior B team scored seven unanswered goals to steal an exhibition victory from the Commanders on Sunday in Drayton Valley.

"I really don't know what happened to us, we sort of gave up and let them beat us," Commander coach Les Stuckler said of the defeat.

"I think also that their size got to us a little bit; they were all pretty big players."

Brad Ferret scored the scoring for the Commanders at the 7:30 mark of the first period and was followed by Randy Barnard, Frank Stables and Don Latta in the scoring parade.

But that was it for the Commanders, as Edson took charge mid-way through the second period.

Trailing 4-0 at the 11 minute mark of the period, Edson scored four times in the middle frame and three times in the third period to steal the win from Drayton Valley.

"I thought the guys played a whole of a game, but Edson just had too many older players, and that's what lost us more than anything else," Commander general manager Ernie Stables said.

"We only had three 30-year-olds on there, where Edson had maybe 12 or more, and there's no way a 17-year-old has the muscle to stand up to a 30-year-old," Stables said.

He said that while the 17-year-olds are good hockey players, they don't have the strength yet to play against the older Junior B players.

Minister is 'misinformed' charges cattle commission

The Alberta Cattle Commission has said that Minister of Agriculture, James Wilson, is "misinformed" by the federal government's recent decision to increase the federal cattle tax from 10 to 15 cents per head.

Wilson's statement, however, is "misinformed" by the federal government's recent decision to increase the federal cattle tax from 10 to 15 cents per head.

Wilson's statement, however, is "misinformed" by the federal government's recent decision to increase the federal cattle tax from 10 to 15 cents per head.

Wilson's statement, however, is "misinformed" by the federal government's recent decision to increase the federal cattle tax from 10 to 15 cents per head.

Conservative estimates are that farmers will receive approximately \$10 million in 1981—twice as much as in 1980—because of the increase in the federal cattle tax.

Wilson's statement, however, is "misinformed" by the federal government's recent decision to increase the federal cattle tax from 10 to 15 cents per head.

Chamber tries again

The local Chamber of Commerce will hold yet another breakfast session to try once again to rejuvenate the sparsely populated business community. Plans to recruit new members were delayed over the last few months while the Chamber executive sought an office space and secretary.

Amazons lose

The Amazons girls basketball squad was edged only one win in the Frank Maddock Girls Basketball tournament on the weekend.

Public hearings likely says MLA

Makin optimistic about project

By Mark Chisholm
Makin's Project, initiated by "very optimistic" about getting a forest management plan for his planned 150,000-acre hardwood project in Drayton Valley, said a company official on Monday.

"We're proceeding with the planning for the mill and completing our studies," added Mr. Makin. The company is preparing for public hearings about the provincial government about the proposed timber area south and west of Drayton Valley to be developed.

most areas awarded to another company. Mr. Makin said he is willing to bid for the large area west and south of Drayton Valley, which contains a large proportion of hardwood trees.

Alberta Housing will probably cancel its study in Drayton Valley

Alberta Housing Corporation will probably cancel a planned feasibility study on subsidizing housing for Drayton Valley as a result of a recent town council decision.

"If council is that sure it doesn't want subsidizing housing, the study probably won't go ahead," said Byron Peterson, a program adviser for Alberta Housing, last week.

Town council at its last meeting voted down a motion by councillor Bob Smith to ask a representative of Alberta Housing to appear before council to prepare a study.

Alberta Housing was planning the study after receiving some encouragement from the former town council before the October 11 decision.

Mr. Peterson said he has not yet received any word from the town about the planned study but it is the decision of council to not proceed. Alberta Housing would not likely continue with the study since the local municipality is required to pay 10 per cent of the study.

Woman trapped in car 3 hours

A Poncha woman was trapped inside her car for three hours Friday night after a collision with a semi-trailer with near Carleton Place.

Diane Shirley Dykstra, 35, was taken to Edmonton hospital in serious condition. She was taken to the Drayton Valley hospital by the Drayton Valley ambulance service, and the local emergency assistance team spent three hours trying to free the woman from her car.

The accident occurred on Highway 20 at 7:40 in the evening.

A car heading westbound struck a semi-trailer which was turning onto the highway, going eastbound, according to police.

The driver of the truck was Donald Babcock of Spruce Grove, was uninjured. Mr. Dykstra's condition, at press time, was unknown.

ALMOST LARGER THAN life is the character of Solomon Spalding, who definitely didn't speak a word when dealing with his students in the Chisle in Wharfedale of Appleton. Spalding died, however, have a few kind words for children at the Edmonton School after the performance there on Friday afternoon.
